**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 27 September 2004.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brooks (4,582,981) in view of Duba et al (5,251,589).

Brooks teaches a glow plug 10 comprising a body 12 having threaded means 48 for affixing the glow plug to the engine block, the body having an outer shell 12 surrounding an inner cavity 14, the outer shell 12 having a hexagonal portion 50 having six faces a circumferential groove 95 formed horizontally in the outer shell and extending completely across all six faces of the hexagonal portion, wherein the hexagonal portion has an upper end and a lower end adjacent the base 12 and the circumferential groove 95 is located nearer the base 12 than the upper end which surrounds an insulator member 44 (Fig. 1). However, Brooks does not teach that the plug contacts the engine block. Duba discloses a glow plug 11 having an outer shell 19 with a housing 13 of hexagonal shape (Fig. 3, 4) that is sealed with the engine block when the plug is vertically oriented, thus having a firm contact with the engine block (col. 4, lines 52-67).

It would have been obvious to one having ordinary skill in the art to modify Brooks' glow plug as taught by Duba in order to contact the engine block and form the seal.

3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brooks in view of Duba and further in view of Bhat et al (4,088,105).

Brooks in view of Duba teaches substantially the claimed invention, but is silent regarding a size of the hexagonal portion and an inside diameter of the groove. Bhat teaches a glow plug 1 comprising a shell 10 that has a hexagonal portion 11 having threads of 0.25 inches and a root diameter of 0.223 inches. It would have been obvious to one having ordinary skill in the art to modify the invention of Brooks in view of Duba and include an inside groove diameter in the hexagonal portion as taught by Bhat, less than 0.275 in<sup>2</sup> as claimed by Applicant, in order to affix the glow plug to an engine block.

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 5507255 (glow plug with hexagonal portion), 4418661 (glow plug with hexagonal portion), 4088944 (glow plug with hexagonal portion).
